Graduates of 1937

THRUOUT the land all educational centers are mak-I ing preparation to hold commencement exercises and turn forth into the world some thousands of graduates. The students listen and some well known popular personages deliver the speeches. They hear themselves pronounced and handed the honor of degree, re- others to join. turn to their seats and adjust themselves to the prospects of a job the day after Commencement. Some are bulging with ideas, mounting ideas--others are already established in waiting positions. The results they obtain lies within themselves, their success depends on the manner in which they do their!

Oh, yes, many sidepaths may have to be taken before reaching the goal, but if the desire to accomplish to retire from control of his business. these ideals is strong enough, they will win. Responsibility either makes or breaks a man. It is by means! of responsibility that we have the modern inventions, and increasing scientific developments. On the shoul- ding them. ders of these new graduates rests the safe keeping of these finest flowers of civilization. They have been developed from the sufferings, the very souls of those who have endured hardships for generations with these results as their reward, and in their realization lies the here of the civilization to come.

A Big New Industry

BEORE than five hundred different concerns are en-! III gaged in the newest of America's major industries. That is air conditioning. The means of se building and equipping houses, offices, factories, stores and theatres! that the temperature and humidity can be controlled at all seasons and under any weather conditions, has in a practical reality of everyday application.

years ago. It will be years before an air-conditioned hange will be as much a necessity for a ser familia an automobile is today; but it is mostly nearly as tainty that that time will come s with aut mobiles increased production bring come down. Inday only the fairly well to do can

affed to quir their bomes ith air conditioning de vices, but in a net far distant towers was house yet so equipped will be regarded as out of date and fit only for the very poor to live in. Permanent prosperity is brought about thru the

successive development of new industries. Air-conditioning is the largest and latest of these and holds un limited possibilities for America's future prosperity.

There are good reasons why some of us never want to believe in mind reading. We shudder at the thought that anyone might be able to read our thoughts
