HIGH SCHOOL REGENTS RECORD IS GOOD

Pupils who took Regents examinations in high school subjects set a new high in Regents records, when 95 per cent of the papers written were given a passing mark. Two hundred and thirty-two papers were written and 220 were accepted as passing papers.

The greater part of these papers are sent to the State Education Department at Albany for official review.

In the elementary Regents an equally good record was achieved with only four failing papers among the 137 papers written by pupils attending the local school.

MISS DAY PRESENTED GIFT

The Sophomores presented their class advisor, Miss Mary Lou Day with a very lovely handbag and vanity as a parting gift. Miss Day was grateful, not only for the gift, but for the motives which prompted the giving of it.

She has served as advisor to the same class for two years and openly admits that she is very fond of each and every member.

HUMOR

Farnham Popen: "I'm glad I won't be living a thousand years from now."
Miss O'Connell: "Why?"
Farnham: "Just think of all the history there'll be to study by that time."
Bally: "Why aren't you in school?"
Eddie: "Because I washed my face yesterday and the teacher thought I was sick and sent me home."
Dick: "Where is Atoms? I can't find it in this geography book."
Mr. Host: "I don't think there is such a place."
Dick: "There must be. This paper says an explosion blew two men to Atoms."
"Is politics are? Or are they is?" I asked a man With a political phiz. And he answered me Without a pause: "Real politics Today are was!"
"Figures can't lie," said the professor earnestly. "For instance, if one can build a house in 12 days, 12 men can build it in one day."
"Yes," interrupted a student — "then 288 will build it in one hour, 17,280 in one minute and 1,036,800 in one second. And I don't believe they could lay one brick in that time." While the professor was still gasping, the smart "ready reckoner" went on:
"Again, if one ship can sail the Atlantic in six days, six ships can cross it in one day. I don't believe that either; so where's the truth in arithmetic?"
Then he sat down.
Mr. Host: "Is there anything that hibernates in the summer?"
Jessie B.: "Yes. Santa Claus."
Ted West: "How are the fish in this stream?"
Ken Vars: "I really don't know. I've been dropping them a line every day, but I haven't got any answer."

SENIOR INTERVIEWS
What is your name?
Orville Mesler.
Where were you born?—Petrolia, New York.
What subject do you like best?—Chemistry.
What is your favorite book?—None in particular.
What do you like to do best in your leisure time?—Play around with electrical or radio appliances.
What do you intend to do after leaving school?—Undecided.
What is your ambition in life?—To become a radio expert.
Orville is one of the more quiet type of Senior boys. He never talks much (at least to the interviewer). Perhaps that accounts for his studiousness and ability to become salutatorian of his class. During his high school career he has been a member of the Hi Herald staff, the High School Orchestra and held class office in his Junior year. A. H. S. teachers and students join in wishing Orville success as a radio expert or in any other career he may choose to follow.
Zoologists say the ostrich is a natural ventriloquist because its vocal sounds are made with the mouth tightly closed.

A DISH FOR THE WEEK

A popular alternate to strawberry shortcake during strawberry season is made as follows:
Fresh Strawberry Pie or Tarts
Fill a flaky crust with large, selected uncooked berries, and pour a clear strawberry sauce over them. To make the sauce, cook small berries and strain them thru a sieve; sweeten to taste, then thicken the juice slightly with cornstarch (add the juice gradually to cornstarch, stir constantly, using one tablespoon of cornstarch to one cup of juice, bring it to a boil and boil for about five minutes); add some butter to give a glazed look to the sauce, and a pinch of salt.
To make the dessert even more delicious, top it with whipped cream. Suggested Menu—Meat loaf, scalloped potatoes and peas, a salad of fresh greens, radishes and tomatoes, bread and butter; fresh strawberry pie or tarts; milk at least for the children and coffee or tea if desired for grown-ups.
The only woman ever legally hanged in North Carolina was executed at Morganton in 1833 for the murder of her husband.
It is useless to try to put the small birds back into their nests. Once a bird leaves the nest it never returns. And don't take the birds into the home and try to feed them. It is a difficult job, and the birds will probably die from lack of the proper food and care. It is illegal, also, to have most birds in captivity without a special permit, even tho a person may think it is a kindness to the bird.
Do not send young birds on to Cornell, as some persons have done. Nothing is gained and the birds may be harmed by this travel. In nine times out of ten, the small bird is better off if left alone for the parents to find and to rear.
The marriage of M. Spicer, daughter of M. E. Spicer to Paul Jos. Buffalo was solemnized June 20, at the bride's parents. Rev. of Andover performed the ceremony. Miss Edna Jo and Miss Onnolee S. ville were the bridesmaids. Robert Spicer acted as best man. Following the ceremony breakfast was served. Mr. and Mrs. Vincent for their furnished Delaware avenue, Bu. The church service was omitted so that the bride can attend the S. tion at Nile.

BIRDS THAT ARE "LOST"
Paul Kollogg
Of all months, June is the month of nesting birds. Occasionally, small birds are seen away from their nests, fluttering around, apparently lost, and possibly injured. Many persons have inquired what to do with these small birds.
The best thing to do, perhaps, is to leave them alone; or to place them on a roof or in some other place out of harm's way where cats cannot reach them. Do not hide them in places where the parent birds will not be able to find them. If left alone, the parents as a rule will find them.
It is useless to try to put the small birds back into their nests. Once a bird leaves the nest it never returns. And don't take the birds into the home and try to feed them. It is a difficult job, and the birds will probably die from lack of the proper food and care. It is illegal, also, to have most birds in captivity without a special permit, even tho a person may think it is a kindness to the bird.
