Clear up your complexion with

MILK

If you are humiliated by unsightly skin blemishes, try this easy, pleasant way to clear your skin. Just a glass of milk at least one meal a day. Cool, fresh, delicious milk. It sounds almost too easy and too inexpensive to work, doesn't it? Here's why it does: Milk is the richest source of calcium of all food. And calcium is one of the first things expensive skin specialists prescribe to clear up unsightly blemishes. You get a calcium beauty treatment with each glass of milk you drink.

Another thing: the more milk you use the more you save.

Milk is today's outstanding example of an economy food!

For A Happy Holiday

The "Glorious Fourth" can be just as glorious | Marc as we choose to make it. This year the long weekend created by the holiday will intensify the hazards which the Fourth produces. The watchword should be "Take care!"

Independence Day celebrates the independence of a nation. The coming week-end will demonstrate vividly the modern interdependence of people. . . . Great streams of traffic pouring over the highways will show how essential are mutual regard and courtesy among drivers. Fireworks will demonstrate it too. A "firecracker thrown by another" is, according to the National Conservation Bureau, the greatest single cause of the tremendous number of fireworks accidents every Fourth of July. At the beaches and lakes, imprudent swimmers will again remind us that human life must be risked to save the life of a drowning person.

Reasonable care divides a happy holiday from the tragedies which mar it. Reasonable care will inmishap. For instance:

If you drive—see that your car is in good mechanical condition. Check tires, lights, brakes, the steering mechanism, windshield wiper, rearview mi ror, horn. Drive skilfully, at a reasonable speed. Observe the rules and courtesies of the road.

If you must use fireworks—give yourself plenty of space. Keep away from children and animals and buildings. Throw firecrackers away from people and inflammable materials, not at them. Never hold an exploding firecracker, nor set them off under a bottle or can. Cauterize the smallest wound immediately; tetanus poisoning works fast and kills.

If you go swimming-swim in safe and protected places. Beware of strong tides and currents. Know your limits as a swimmer. Wait two hours
