Muresco
 A water paint made by the Benj. Moore Co., that is one of the best. A five-pound package properly prepared and applied, will cover 450 square feet of wall surface, or about the same as one gallon of ordinary inside gloss or flat pigment paint.

Muresco is supplied in white and 17 colors, and may also be blended to produce or match any color you desire, from a delicate cream or ivory to all shades of green, blue, yellow or brown.

The cost of a coat of Muresco is only about one and one-third cents a square yard and will give you a clean, dry, hard finish on brick, tile, wood, cement, wall board or plaster and may also be used over old wall paper.

It dries quickly, flows evenly, will not peel, blister or chalk off and may be cleaned with regular wall paper cleaner or soap and water. We have an area painted with Muresco some years ago, and the surface is clear and firm.

Try Moore's Muresco—it is clean, sanitary, and fully meets the need of those who wish to beautify their living quarters at low cost.

WAFTINGS

from "Wandering Willie"

THEY went, they saw, they participated (and imbibed) and returned (we'll take that back as they did not all imbibe.) We're talking about the doings over at Whitesville last week. The firemen and Legion band boys made a fine appearance and had as neat a line-up as any in the "big parade."

If they do as well over to Bolivar this Friday night and at Dunkirk at the Southwestern convention August 6th they should get a cup of some kind for just being "that way."

AND while talking about conventions (or other weeks when we want to get out a day earlier), we put the usual notice for correspondents to get their copy in a day early so that we could go over to Whitesville ourselves. But alas, only three showed up. Nevertheless we found the necessary copy to fill that page, said to heck with them—and went to the convention anyhow.

THE Andover News has an opponent in the local field of journalism, The Andover Weekly Gossip, published by Richardson & Vars—(Regina Ann and Wendall to be exact.) While not as nifty as the New York American or some of the other "little ones," this paper, with a net paid circulation of six copies per week appeared this week Monday.

IN LAST week's paper about the finding of the lost child by the Andover firemen, the name of the stroller was omitted as we were not sure as to just who it was. It is not every fire department that carries an expert tracker on their membership roll. But the credit goes to Roger Tuttle, he was the lad who followed the tracks which led the boys to the boy who was lost, or something. Anyhow, "Tut" picked up the trail and after slouching hither and yon, slouched his way right to the boy's side. Hats off to "Tut."

"BILL" Lang of the Market Basket has been wondering lately just what the women of the village do with the time they used to use in cutting bread, now that it comes all sliced. Why don't you ask 'em, "Willie?"

Broiling is the method commonly used by Eskimos for cooking meat.
