But it may be true that too many people are interested in watching sports and too few disposed to engage in hem for the health and welfare of our citizens.

If this is the situation, it would seem that each "COLF is the greatest game in the world," said an community should give thought and consideration ways and means of encouraging sports and recreation for the many. Whether we like present trends or not economic conditions are inevitably creating more and more leisure for the average citizen. Effective use that leisure in the years to come will mean much determining the character of our citizens, both here and in the nation as a whole.

It was with this same thought in view a few years! ago, that Andover's athletic field was started, and althe the field isn't as yet working to full capacity, Andover does have for the first time in its history, a real athletic rark, with endless possibilities for developmen as the grounds are laid out for softball, tennis, foot hall and track events, as well as a first class baseball

There is one feature, however, which the commit tee responsible for the present athletic field had mind when contemplating on the proposition that has " not been forthcoming, and that is an adequate swimming pool. There has been considerable discussion proand con in regard to swimming in Andover, but the erection of a public pool on the athletic grounds has so far been out of the question, both because of the initial cost of building such a pool and the cost and responsibility entailed after its construction.

Now the Andover Exchange Club has come for- termed. ward with the Andover pond project which has brought! a lot of favorable comment and praise from Andover! people. In fact, we have yet to hear a single voice raised against this idea by Andover citizenry. Everyone thinks it a fine idea, but whether or not it is ever WE READ the other day of a railroad conductor who evening at 7:30 p. m. We shall be ideal, and its doctrine of race as a worked out depends largely on the attitude of And. I has just retired on a pension after 40 years on one continuing the studies from the book divine revelation. over people.
