**Andover People Are Asked to Conserve Water**

**Residents Wasting Water By Letting It Run, S. Board Members. Punished Forced to Run Daily.**

The Village Board has been with the problem of maintaining adequate water supply for a few months, and have had the pump at the reservoir at day and in some instances has run the full 24 hours the water in the reservoir to level.

It has been brought to the attention of the board that some of the village have conceived the idea that by letting the water run continuously, it proves the taste of the water. The village authorities say "no."

The bad taste we are getting our water comes from the pump from the small amount of water which is being put into the springs, claim the authorities the more you let the water waste, the more the pumps have to run and the more water is being used. The village engineer states that anything to satisfy themselves to the above statement are to go up to the springs the water coming from the for themselves.

So, by letting your water run, you are not only incurring a waste in regard to the water, but you are also incurring a waste of money because of the water being used.
