Infantile Paralysis To Have a New Foundation President Roosevelt's Birthday Party Fund Go to Finance New National Foundation Committee Appointed

In a statement recently issued President Roosevelt says: "I have been very much interested in the work that we have done at the Georgia Warm Springs Foundation for over ten years to the very definite conclusion that the best results in attacking this disease came by approaching it from any single one of the many areas in which this disease is spreading its destructive influence. I have had in my mind the constant accumulation of ruin which must continue unless the cause can be brought under control and its after-effects prevented."

My own personal experience during the work that we have done at the Georgia Warm Springs Foundation for over ten years to the very definite conclusion that the best results in attacking this disease came by approaching it from any single one of the many areas in which this disease is spreading its destructive influence. I have had in my mind the constant accumulation of ruin which must continue unless the cause can be brought under control and its after-effects prevented.
