Erie to Put on Another Fast Train

Cleveland, O.—Effective Saturday, June 3rd, the Erie railroad will inaugurate a new passenger train to supplement its present fast service between New York and Chicago according to an announcement by C. C. Howard, passenger traffic manager.

The new train, which will be made up of modern air-conditioned equipment, including sleepers, lounge cars, diners and coaches, will be a westward extension of the railroad's present "Lakes Cities Express" which now serves the territory between the Erie's New York terminal at Jersey City, N. J., and the Great Lakes cities of Cleveland and Buffalo. The junction point will be at Salamanca. The extension will provide an additional service thru Northwestern Pennsylvania, Ohio, Indiana and Illinois to and from Chicago.

The announced schedule for the new train, which will be a companion service with that now offered by the Erie Limited and the Pacific Express, calls for a departure from Chicago at 9 a. m., daily, arriving in Jersey City at 7:45 a. m. the following day, approximately 22 hours. Westbound, the train will leave Jersey City at 8 p. m., Standard time, arriving Chicago at 5:20 p. m. the next afternoon.

This new train, Mr. Howard said, has been instituted primarily to take care of the indicated heavy travel to and from New York on account of the World's Fair, as well as to provide an additional service to the many large centers of population along its right of way.

L. & C. Launches Spring Clearance Sale

In a campaign to match the sales volume record of last May, the L. & C., Coat, Suit & Dress Co. of Hornell this week launched a spring clearance and pre-summer sales series designed to eclipse any single month's selling program ever conducted by a store in this section. In more than 20 years of store service the L. & C. has catered to the apparel needs of women and children.

"Last May was one of the all-time high months, possibly the highest, in sales in the history of our business," Charles Wineburg, store manager, said. "We hit a record that not only can hardly be beaten, but scarcely can be equalled, except as we make every inducement in sales values possible for patrons thru this month. We are intent on doing our share. And I know that women are going to find May does offer them one of the biggest buying events in our history."

The L. & C. has become not only the largest retailers of women's and children's wear in the section, but one of the largest in the entire state outside of New York. By linking an aggressive advertising program with a store policy to have an apparel stock in an almost unlimited price and style range, it has provided a several-county area with one of the outstanding retail store developments of the last quarter century.

HOW, WHAT AND WHY?

Special to the Andover News

The Andover News has arranged with the Office of Information of the New York State Colleges of Agriculture and Home Economics to answer questions about problems of farm and home. If you enclose a self-addressed stamped envelope and mention the name of this paper you will receive a direct reply to your query from the colleges. Do not ask more than one question in one letter or on one postcard. Ask as many questions as you like, but make each one a separate communication.

Dusting Raspberries

Miss K. P., writes: "I have some raspberry plants I wish to dust this spring. When is the time to dust them? What kind of powder should I use?"

J. A. Evans of the entomology department answers: "Altho arsenate of lead has been used in the past, we would now recommend that you apply a dust containing three-quarters of one per cent rotenone about two weeks before the raspberries bloom, and another application a week before bloom."

"A prepared rotenone dust is usually available from local supply stores, and also from seed and flower shops under various trade names."

Herb Gardens

E. W., asks: "How large a space is needed for an herb garden? Can herbs be planted hit or miss in the regular flower garden?"

A. E. Griffiths of the department of vegetable crops answers: "Little space is needed for the herb garden. A plot twelve by eighteen inches is enough for one variety of culinary herb to supply an average family. You may have as many plots of that size as space allows or as varieties are desired."

"The herbs can be planted in the regular flower garden. Many of the flowers already in the garden are herbs, such as hollyhock, pansy, rose and violet. More herbs would be pleasing, arranged to fill in the bare spots or to cover tall barren stems."

"Perennial decorative herbs would be best, such as mugwort, rosemary and hyssop. In such a planting, do not use the annual culinary herbs which are harvested early in the summer and would themselves leave bare spots."
