Today's popularity of Doan's Pills, after many years of world-wide use, surely must be accepted as evidence of satisfaction. And favorable public opinion supports that of the able physicians who test the value of Doan's under exacting laboratory conditions.

Burning, stinging or too frequent urination sometimes warn of disturbed kidney function. You may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, pain under the eyes—feel weak, nervous, allayed out.

Use Doan's Pills. It is better to rely on a medicine that has won world-wide fame than on one of doubtful quality.

A tourist insisted: "Those are gulls."

"Well," said the Irishman, "gulls or boys, they're a fine flock of pigeons."

### New Federal Seed Act Will Protect Farmers

Extends Protection of Seed Law to Those Who Buy Seeds Outside State.

Protects Seedsmen as Well

Farmers of this state are bound to be greatly benefited by the new Federal seed act, which after two years of extensive study and consideration by Congress, became a reality with the approval of the President on August 9th. This is the opinion of Prof. M. T. Munn, in charge of the State's seed testing laboratory at the Experiment Station at Geneva, who points out that in the past, many farmers who bought seed outside New York State did not get what they bargained for, in many cases, and because the purchase was an interstate transaction, the State seed law did not apply.

"This new Federal seed act requires that all seed shipped into New York State in interstate commerce must be completely and truthfully labeled to comply with the requirements of the New York law," says Professor Munn, who continues as follows: "This very materially curtails the movement of noxious weed seeds and if the local seed law is deficient in any respect it can be remedied by legislative action. One very helpful provision is that false advertising is prohibited, that is to say, the type of advertising which leads the farmer to believe that he is to get some exceptional bargain or unusual seed stock at a very low price."

"A particularly helpful means of protection to farmers as well as to local seedsmen who obey the State seed law is the requirement that all agricultural and vegetable seeds which are transported across state lines by trucks direct to the customer must be fully and truthfully labeled as well as seeds transported by other means as a result of mail orders. In the past all sorts of untested and unlabeled seed stocks have been trucked about promiscuously and peddled to unsuspecting farmers at so-called 'bargain' prices."

The interstate clause of the law will be administered in co-operation with State officials and it is confidently believed that the quality of seed offered by certain sources will be vastly improved, and also, that unfair practices in the trade will be greatly minimized.
