### Airplanes Prove Value In Fighting Forest Fires

The use of airplanes to fly both men and supplies to fires has helped to simplify many of the problems of fire fighting and to speed up control of going fires, the forest service, U. S. department of agriculture, ports. Days once were required transport fire crews and equip-ent into the back country... The reports. ment into the back country. The airplane does the job in minutes

sirplane does the job in minutes or hours.

Seventy-four landing fields in national forests permit a kind of airplane taxi service to be operated between a headquarters station and the field. Firefighting crews are flown to the landing field nearest after and then proceed by foot or other means to the burning area.

Another use of the airplane now being developed may give additional aid in fire fighting, the forest service says. It is possible that aerial photography can simplify the dangerous and time-consuming task of scouting large fires. Results already obtained indicate that a photographer in a plane may circle over the fire, take pictures of the entire front, and drop finished prints to men on the ground in 18 minutes or less. Photos showing topography, fuel types, streams, roads, trails and other ground features in the vicinity of a fire can thus be delivered to the crews before a man on the ground could even hike around the fire line.

Airplanes also carry two-way radio sets which keep them in contant communication with fire camps and national forest headquarters. Messages from the air to the ground also have been transmitted.

ters. Messages from the air to the ground also have been transmitted by an amplifier which makes the human voice audible for an average distance of one and a half miles. The amplifier does not permit of two-way communication, but it has been helpful in directing lost perbeen helpful in directing lost per sons and searching crews, in guid-ing fire crews to spot fires back of the line which can be seen from the air only, and in giving other emer-gency messages.

### 'Non-Driving' Pedestrian Is Easy Traffic Victim

This isn't very encouraging, but:
If you're a man more than 50
years old; have never driven an
automobile: take walks at night and
like to take a little nip occasionally,
then you're more likely than anyone
else to die in an automobile accident

This is the picture painted by Bur-ton W. Marsh, director of safety and

This is the picture painted by Burton W. Marsh, director of safety and traffic engineering department of the American Automobile association to represent the average present-day pedestrian accident victim. Marsh told advanced students in a traffic safety class at the Pennsylvania State college that in Connecticut alone, according to a three-year survey, 95 per cent of the pedestrian fatalities were persons who could not drive.

"The hardest thing for the non-driving pedestrian to realize is how hard it is for a driver to see him at night," Marsh said.

"Another discovery," he added, "is this: The man 50 or over who advises little Johnny to be careful crossing the street has five times greater chance of being killed by a car than Johnny."

25,000,000 Candlepower Light A 25,000,000 candlepower beam of light is being produced from lamps no bigger than a cigarette in a searchlight that will soon be demonstrated by the General Electric company, and used to illuminate the tower of its New York building. The lamp is a high pressure mercury arc enclosed in a strong quartz tube surrounded by an ordinary glass tube through which cooling water flows. The high power military searchlights exceed the mercury arc type in power and efficiency, but the latter has advantages in installation in difficult positions. Three cigarette size lamps, each using 1,000 watts, will be used in the new flood lights. They are cooled by the circulation of water as is done in the automobile engine and radiator. 25.000.000 Candlepower Light and radiator.

New Oil Paint Developed

New Oil Paint Developed
Those who experience difficulty in
obtaining flat wall finish may find
the answer to their search in a new
quick-drying oil paint recently announced. According to the manufacturer, it is odorless and is reduced with water instead of thinners. It dries in 30 minutes and
seals in one coat. Among its other
advantages are that it can be
second-coated in 30 minutes, is washable with soap and water or any able with soap and water or any cleaner suitable for oil-painted sur-faces, is water resistant, has a new suede-like texture, and makes a good primer for enamels and other glossy finishes on unpainted woodwork finishes on unpainted woodwe plasterboard, brick, or concrete.

Rain Makers Bath

Rain Makers Bath
Among the natives of New Guinea
it's not cricket for the local rain
maker to take a bath during the
rainy season, as this act would, according to belief, bring down veritable deluges. Native superstition
says that when the rain maker
bathes, rain will fall; when he shuns
the tub, the rain will cease. If the
rain maker should-by chance feel
that he is not well enough paid for
his services, he has only to go
against the will of his village in his
weather making. Seeing the point,
the people will usually raise his
wages.

### School Directors Meet

A meeting of the school directors of the Fifth Supervisory District of Allegany county was held at Pickup's restaurant, Wellsville, Tuesday forenoon for the purpose of organizing

George Robinson of Alfred called the meeting to order and officers were elected as follows: Chairman: George Robinson, Al

fred; clerk, Mrs. Marion Righy of Whitesville; tellers, Mrs. Eva Champ-lin, Alfred and Churchill Ward of Wellsville.

It was voted to hold the next di-It was voted to have rectors meeting at Pickups.

rectors meeting at Pickups.
Directors present were: George
Robinson, Mrs. Eva Champlin, Alfred; Mrs. Martha Robinson, Andover; Mrs. Martha Kear, Mrs. Marian Rigby, Whitesville (Indepen-dence); Mrs. Helen Miriam, Mrs. Marguerite Black, Scio (Ward); Mrs. Clara Quick, Mrs. Arlene Harder, Wellsville (Willing); Mrs. Florence Earley, Andover, also Bayard Tullar and Churchill Ward, Wellsville di ectors were absent.
Following the meeting Supt. and

Mrs. W. G. Pope entertained the diectors at iuncheon at Pickups.
