Mr. and Mrs. Dan Mullen and sons Daniel and Gerald spent Sunday with Mr. and Mrs. Jay Rhoades and family of Elkland Pa.

Adelbert Gayhart of Lever Hill was a business caller in this place Wednesday.

Curtiss-Wright Team to Meet Wellsville Sinclairs In Benefit Game

The annual benefit baseball game for the benefit of the Tullar Field lights, promises to be the most interesting game of the season.

Thursday, June 27, the Wellsville Chamber of Commerce brings to the people of this section the outstanding ball game of the season. They have secured the Curtiss-Wright team from Buffalo to oppose the Wellsville Sinclairs. The Curtiss team represented New York State at the National Semi-Pro playoff in Wichita last year and it is expected that they will put the fastest team on the field that has appeared here in several years.

In order to supply many laughs there has been arranged a one-inning game between the Wellsville Rotary and Exchange Clubs. Many of the old timers will again see action. This one-inning game will start promptly at 8:15 p. m. (DST) and the regular game will be started at 8:45.

Crandall Picnic

The Crandall Klan of Western New York and Northern Pennsylvania are to hold a picnic at the hospitable home of Mr. and Mrs. W. T. Bliss on Olean street in Bolivar on Thursday, June 27 at 1 o'clock. All are supposed to bring sandwiches and a dish to pass, with dishes and silver for their own families. Everyone in any way connected with the Crandalls are expected to attend.

How One Woman Lost 20 Pounds of FAT

Lost Her Prominent Hips
Lost Her Double Chin
Lost Her Sluggishness
Gained a More Shapely Figure and the Increase in Physical Vigor and Viracousness Which So Often Comes With Excess Fat Reduction.

Thousands of women are getting fat and losing their appeal just because they do not know what to do. Why not be smart — do what thousands of women have done to get off pounds of unwanted fat. Take a half teaspoonful of Kruschen in a glass of hot water first thing every morning to gently activate liver, bowels and kidneys — cut down your caloric intake — eat wisely and satisfactorily — there need never be a hungry moment!

Keep this plan up for 30 days. Then weigh yourself and see if you haven't lost pounds of ugly fat. Just see if this doesn't prove to be the surprise of your life and make you feel like shouting the good news to other fat people. And best of all a jar of Kruschen that will last you for 4 weeks costs but little. If not joyfully satisfied — money back.

DESCRIPTION OF NEW BUILDING

(Continued from First Page)

laid out. Bleachers, which fold up into recesses in the wall when not in use, extend across one side of the room.

Complete locker and shower facilities are available for both boys and girls, while adjacent to the Gymnasium is a storage room for equipment.

The first floor is devoted primarily to the lower elementary grades, Kindergarten, Agricultural room and shop, cafeteria, health room and administrative offices. The Kindergarten is equipped with hexagonal tables and chairs, sandboxes and some individual desk units, done in natural maple finish. It is not expected that the school will be able to operate this department during the coming year.

The health room is located adjacent to the main office, and equipped with examination compartments, a hospital cot, weighing and measuring scale, desk and chairs. If finances permit, a school nurse will be employed for the coming school year.

The Industrial Arts and Agricultural shop unit is located in the east wing and consists of a classroom in which the agricultural classroom will be given and a large shop room, which is equipped with work benches, tool cabinets and tools, wood lathe, grinder, drill press, circular saw, forge and anvil, together with numerous small tools for all types of shop work.

Milk testing equipment also will be installed for instructional purposes. At one end of the shop the floor is of concrete, and a large lifting door has been provided to permit the bringing in of large machinery for use in the shop work.

The Administrative Offices consist of a reception room and general office, handling office calls and routine, and the principal's office, which also serves as the Board of Education's meeting room. From the Principal's office is controlled the combined radio receiving and public address system, which permits the reception of educational programs from broadcasting stations outside the school and for announcements by the principal through the building.

The first four elementary grades will occupy rooms on the first floor.

The Cafeteria is located in the center wing, directly across the corridor from the auditorium. The place will seat about 100 persons. The cafeteria was designed primarily for use by the pupils who come on busses or who live too far away to go home to their lunches. Pupils may bring their lunches, and supplement them with hot dishes from the cafeteria or a full lunch may be purchased. It may be necessary to divide the lunch periods into shifts, with the younger pupils eating during the first shift and the older ones during the later shifts.

In addition to its use as a dining hall, the cafeteria will also be used as a music practice room at other time than the noon lunch period. Adjacent to the room is the music teacher's office and storage room for instruments. A small stage is at one end, where small groups may present programs or be seated for banquet occasions.

The dominating feature of the second floor is the School Library. The seating capacity is about 60 pupils, and the school routine will provide for its definite use as a study room at stipulated periods by the high school students. Adjoining the library is a Library conference and work room. The library is finished in white mahogany and the furniture matches the woodwork. Equipment includes a librarian's desk, teacher's desk, card catalogue file, dictionary stand, a book truck and book shelving of harmonizing finish, besides the usual tables and chairs.

The Home-Making Suite has a south exposure, and consists of a Living Room and Kitchen unit. The Living Room is equipped with the furniture ordinarily found in a modern home, and also several work tables and sewing machines for the classwork in sewing. At one side of the room, there are built-in storage compartments and wardrobe spaces.

The Kitchen furniture consists of two cabinet sinks, four portable cabinets and a built-in section of cabinets along one wall. Along this same wall are installed two kitchen ranges and a refrigerator. A dining room table and chairs, with service for eight persons, are also included in the kitchen facilities. The woodwork and cabinets are finished in ivory.

A Corrective Exercise Room and Typing Room also are features of the second floor. The former room is used for individual corrective exercises, under the direction of the physical education teacher, and is equipped with stall bars, horizontal ladder, posture mirror and mats. The Typing Room will be equipped with drop-head typewriter desks, supplied with standard makes of

typewriters. This room will be used for bookkeeping and other commercial subjects as well.

The Science Laboratory contains four six-student laboratory desks, at which individual experiments in Physics, Chemistry and Biology can be carried on. There are also 24 tablet arm chairs and a teacher's demonstration desk in the front of the room which will be used for class recitations. A dark room is provided for photographic work, while a store room is off the laboratory.

Two Faculty Rooms, one for men and the other for women teachers, are also on the second floor.

The west wing on the second floor will have the fifth and sixth grades, while the east wing and front of the building house the Junior and Senior High School grades.

Through the building are general architectural features, with varying points for special needs of some particular room. The floors in the classrooms are oak block. In the hallways and cafeteria, the floors are terrazo, while in the library they are cork, to deaden sound. In the auditorium and gymnasium, the floor is narrow strip maple. The library and health room have rubber tile and the kindergarten and home-making has linoleum.

Indirect lighting has been installed throughout, except in the auditorium, shop, laboratory and cafeteria, where it is from recessed lights.

A telephone system operates from the General Office to all rooms and basement, so that the principal can be in communication with any part of the building promptly.

All grade rooms have built-in wardrobes. Corridor lockers are provided on the second floor for high school students.

The heating system for the school will be with natural gas, and consists of boilers with which either coal or gas can be used in the basement and heat control equipment through the buildings.

A handy vitamin chart that can be tacked up in the kitchen is available free to New York State homemakers. They should send a penny postcard to the Office of Publication, Roberts Hall, Ithaca, N. Y., and ask for bulletin E-289.

WOMEN IN "40'S"
Read This Important Message!
Do you dread those "trying years" (35 to 50)? Are you getting moody, cranky and nervous? Do you fear hot flashes, weakening dizzy spells? Are you jealous of attention other women get? THEN LISTEN!
These symptoms often result from female functional disorders. So start today and take famous Lydia E. Pinkham's Vegetable Compound. For over 50 years Pinkham's Compound has helped hundreds of thousands of grateful women to go "smiling thru" difficult days. Pinkham's has helped calm unstrung nerves and lessen annoying female functional "irregularities." One of the most effective "woman's" tonics. Try it!
