He has hoped to find a stingless bee, but expressed much satis faction with his boe, which has a sting but which is considerate in its! The honey bee that won't fight 1 back seems to be fully civilized. Dr. 4 Watson opened the hive and took out a honey frame only to notice that these bees had a different reaction. He then pounded the hive, knocked the frame and brushed the bees off the honey combs.

Late in the summer, Dr. Watson

was able to requeer most of his yard in

with queens iniced from this beil ized" hive. "It is too early to tell what her editary factor has produced the gan said Dr. Watson in an in-"It may be dominant, recessive or even environmental." A side issue in the bee work is the photographing of the bees, the bee yard and the laboratory work incident to the research. Huber Watson, a senior at Alfred, is "right hand man" to his father in the bee work and takes general charge photography.

Miss Rae Whitney, now doing graduate work toward a doctor of philosophy degree at the University! of Wisconsin, and assistant to Dr. Watson for several summers, will is help him again next summer. She 😽 was graduated from Alfred University in 1936, with a major in biology and was granted a master's degree from Brown University in 1940.

The term "spud" commonly used for potato, came from the initials of an old dietetical society called the "Society for the Prevention of Unwholesome Diet."

To know the difference in flour different flours absorb smounts of liquid.
