alike have a clear definition in their minds-of the probtives face in these troubled world times. list the most important points upon which Congress en no quarter. Moral principles, Christian teachings.

should fix its unwavering attention. They would cer- are scoffed at. That is not pretty. But it is true. tainly include the following: 1.-National defense is of primary importance.

sound social gains that have been won over the course get that we can be destroyed from within no less than !. of the years. But the Congress does have a schedule from without. of modification and clarification that it could well face tion more soundly and for the good of all Americans. pair; now the report of the Smith House Committee studying that Act and the Board administering it points once again to the necessity for changes. The principles behind the Walter-Logan Bill, which narrowly lic men. failed to become law this last session, are worthy ones: in some form, they are deserving of more Congressional thought. Measures following the pattern of these projected items of legislation virtually demand the consideration of the new Congress.

Essentially, the 77th Congress has this touchstone to test all its acts: Consider the safety of the United States, and promote internal harmony so that our industries and our whole national life will be strong. it works in that spirit, it can make "77" a real lucky number for our great nation and all the people dwell here in peace and in freedom.

Taking Inventory

HIS is January, inventory month. Since earlies times it has been the custom of businesses take stock of the goods in hand; to take accouncredit on the one side and the debit on the other. Andover merchants have probably already commence this sometimes laborious but necessary task. They did it years ago when the country was young. As they did it then, so we do it now, with modern variations.

applies not only to our worldly goods and chattels; wise is the individual who takes inventory of health and r be lavishly wasted. strength, of brain and energy... Taking stock of what we have may bring surprises and reveal talents and find that losses must be retrieved.

The individual may well take account of what he is and what he wants to be. Ask yourself: What are , your personal relationships with other people; have they Winter Driving improved or turned sour? What about your habits: which way is the trend? What about prejudices; there reason for them and do they hamper or help? What about personal appearance, health, recreations, pleasures and hobbies? Have you learned anything new and useful? The world moves, you know, and you, move with it if you progress. No successful business can be carried on withou taking inventory. No successful life can be lived without taking stock.
