Baker's Hardware News

BEHOLD!

Two men did have plows to repair. The one had repaired and started field work, while the other did wait for repairs. The repairs came when the other finished plowing. When the seeding was done so was the repairing, and the rains did come, and for many days and nights neither could get in his field. The one field which was sown early did turn green, and the green grain grew while the other was barren. The harvest came. He that had repaired and sown early did fill his bin to overflowing, while the other had chaff.

Verily, Verily, I say unto you, get those repairs done early!

The Garden Seed Situation

There have been recent articles in newspapers concerning the scarcity of garden seeds this Spring. Contrary to these articles, we will have our usual supply of bulk and package Seeds to supply your demands. For many years our seeds have grown good gardens in Andover and those who use care and judgment in seed selection demand our seed year after year.
