RANDOM SHOTS By RALPH SHAFF

By the looks of the gang of hunters that gathered at the club rooms Sunday for the purpose of trying to rid this section of marauding dogs, and the specimens that was brought in for study. The sportsmen in the vicinity of Andover mean to really put a stop to the destruction of wild game and livestock by this type of killer.

About 50 men answered the call and it fell to Charles Gleason to put the quiet-us on the first of the pack to run afoul of the hunters; another was left in the woods badly crippled.

Yours truly feels rather bad that the pictures were no good that were snapped of the killer.

Area sportsmen, together with club members are to go out after the remainder of the past Sunday at 10 a. m., and hope to continue along with Deputies Kemp and Jack-

son until all of the dogs are accounted for, including the litter that is now hid somewhere in the hills.

The Rod and Gun Club wish to thank the farmers and people who live in this area for their co-operation in keeping their dogs in and also reporting the appearance of the wild pack as soon as they see them. It was thru the reports of W. E. Green that the hunt was so successful, it allowed Deputy Kemp and Jackson to place the hunters in the area where these two dogs were working. Anyone seeing or hearing these killers please notify Kemp, Jackson, myself or any member of the club and it will assist in the hunt next week.

FIRE PREVENTION WEEK

October 5th-11th

Fire losses in this country during 1940 were estimated at \$306,469,000. According to the National Board of Fire Underwriters, this would have paid for the purchase of 45 cruisers for our Navy!

There are countless ways in which adults, thru ignorance or carelessness start fires.

As our part in National Fire Prevention Week, may we suggest that you take the following precautions:

- 1—Clean your Chimneys and Stove Pipes — Soot Remover will do the job well.
- 2—Insulate your furnace pipes with Asbestos.
- 3—Check your gas and electrical appliances for bare wires or leaks in hose and pipe connections.
- 4—Burn your papers and refuse in Wire Rubbish Burners to confine flames to a limited area.
- 5—Analyze possible fire hazards in your home and rectify the condition.
