GAS TANK TOPICS

Did you know that there is so much difference between the wear your tires get that the left front takes only 14% wear while the right rear suffers over double, or 38%? The other tires are in between. Cross switching every 5,000 miles equalizes the wear, and if you put your spare in circulation, you automatically get 25% more mileage.

Have you a tire to retread? If you have, bring it in, we are prepared to take care of your needs.
