Diet Fads Bunk? Doctors tell us that most of the ideas and fads regarding dieting for health purposes are bunk. There the idea that eating meat increases the blood pressure and makes a person more "animal" and warlike. Eskimos have lived on meat for centuries, and are very 'healthy and peaceful. Some people vegetarians, believing that meat causes cancer. But the facts are the many animals which live entirely on vegetables have cancer. and no more commonly than animals that live mostly on meat. Fastling is another fad which is supposed to cure all manner of ailments, yet 'doctors say that fasting is a very dangerous practice the way most people do it. Medical science rarev finds anything commendable in popular health and diet fads-they are nearly always pure bunk.
