

Louisa's Letter

Answer to L. R. — Texas:

Your letter was too long to print, but I will try to help you. You have been very wise to behave as you have. A boy never respects a girl for lowering her standards, no matter what he may say to the contrary. In fact, if a boy really and truly loves a girl as he should, he will do his best to protect her and keep her out of trouble.

Never let a boy fool you about loving you more if you do wrong. You not only lose his respect, but you lose your own self respect. Such a memory will remain with you and later on you will regret it a hundred fold if you meet some other man you love. Even if you marry this boy, you will always be ashamed of what you did and it will have a stain on you for the rest of your life.

If you feel that temptation is too great, than the wisest thing to do is to stay away from it.

Unless you are willing to give up dances, etc., that this boy dislikes, it will be best not to marry him. As someone has said, the only time it is wise to marry is when you feel that life is not worth while without that particular person and then you will not care whether you go to dances or not.

Good luck,

LOUISA.

T. "Will" — Conn.

You don't say why you won't marry this man. It is because you think he is too old for you, or is it because he hasn't asked you?

LOUISA.

To Tell — Texas:

Fourteen is rather young to be going to dances unless they are school dances with boys and girls of your own age. I am not surprised that your mother objects to you going to public dances with older boys. When you grow older you will realize that she is doing her best to take care of you and not let you grow up before your time. The years will pass in a hurry and you will soon be a young lady and that will be time enough to go to public dances.

LOUISA.

Dear Louisa:

I met a boy several weeks ago who is stationed in a camp nearby. We fell very much in love. He is very handsome and generous and we are planning to get married before he leaves.

I have never met or heard from any of his people as his home is a great distance from mine. I do not even know what job he had before he joined the army.

Do you think I am making a mistake in marrying someone I have known such a short time? I don't think I could ever love anyone as much as I do him, but my parents want us to wait until he comes back.

RACHEL. — Wis.

Answer:

I agree with your parents. To begin with, all boys seem most romantic in uniform, and you will probably be very much surprised the first time you see this boy in civilian clothes. You may be pleasantly surprised, and on the other hand, you may possibly get a shock.

Then, too, just as present you are very much in love and, as you know, love can be very blind. You haven't known him long enough to find out his bad traits. You only know his good ones.

You say he is generous—well, it may be a good point and it may be a bad one. He may be one of those generous people who spend all their money on a good time and never have any left for the necessities of life. You say he is handsome. Well, that doesn't mean a thing, either, if he happens to be selfish, lazy or irresponsible!

You are planning to get married and neither you nor your family have made any effort to find out about this boy's family or about him. If you were going into any kind of business partnership would you go into it blind, and without knowing anything about your partner's finances or capabilities? Certainly you would not. You would require all sorts of references and want to know something of his reputation in the business world.

How much more important it is to find out about someone you are planning to take on for life! This boy may have a wife at home. Certainly, if he is the right kind of person he can have no objection to your parents finding out something about his life and people.

So I say, stop, look and wait. It

will do neither of you any harm to wait until after the war is over and if he comes home and you are still in love, that will be time enough to consider marriage.

On the other hand, if this feeling you have is infatuation and you find, when he comes back, that you both feel differently, you will be free to go your separate ways with no harm done.

LOUISA.

SUMMONS

STATE OF NEW YORK
COUNTY COURT:
COUNTY OF ALLEGANY,
GERTIE GLASE SLOCUM,
Plaintiff

against

BERTHA BLAUVELT SMITH, NI-
NA WITTER, RONALD WITTER,
HOWARD WITTER and CHARLES
SLOCUM,
Defendants.

TO THE ABOVE-NAMED
DEFENDANTS:

YOU ARE HEREBY SUMMONED to answer the complaint in this action, and to serve a copy of your answer, or, if the complaint is not served with this Summons, to serve a notice of appearance, on the plaintiff's attorney within twenty days after the service of this summons, exclusive of the day of service. In case of your failure to appear or answer, judgment will be taken against you by default for the relief demanded in the complaint.

Trial to be held in the County of Allegany.

Dated: May 11th, 1942.
REGINALD J. SOOTHERAN,
Attorney for Plaintiff
Office and Post Office Address
Andover, New York

TO RONALD WITTER:
The foregoing Summons is served upon you by publication pursuant to an Order of Hon. Ward M. Hopkins, County Judge of Allegany County, dated May 29th, 1942, and filed with the Complaint in the Office of the Clerk of the County of Allegany at Belmont, New York.
REGINALD J. SOOTHERAN,
Attorney for Plaintiff.

The object of this action is to partition certain real property in which the said Ronald Witter has an interest, which interest is described in the Complaint filed in the County Clerk's Office at Belmont, New York, and that a brief description of the property affected by this action is being a house and lot situated on the Easterly side of Third Street in the Village of Andover, New York, and being the property owned by Chancy G. Witter during his life time and described in a Deed from Joseph L. Williams and Ida Williams to the said Chancy G. Witter, and recorded in Allegany County Clerk's Office on the 12th day of March, 1924, in Liber 259 of Deeds at Page 67.

COMMANDANT W. A. C. TRAINING SCHOOL — Colonel Don C. Faith, Infantry, who will direct the training of women officers at Fort Des Moines, is a native of Indiana and entered the Army in 1917. He has seen service in China and the Philippines and has wide experience as plans and training officer. He leaves the post of executive officer of the operations division of the Services of Supply in Washington to take up his work with the Women's Army Auxiliary Corps.

On the Job.
The Motorist — "Say, friend, my engine's stalled. Think you can help me find out what's the matter with it?"

Constable Talltimber — "I can, but I won't just now. I can't pinch you for speedin', but in ten minutes I'll fix your engine, an' then pinch you for parkin' here too long."

TO SHARPEN YOUR MILITARY I. Q.

1. These crossed flintlock muskets are the insignia worn by soldiers in what branch of the United States Army?
2. Watch this one. Define AWOL.
3. Women in the newly organized Women's Army Auxiliary Corps will serve in non-combat duty. What American woman fought with men on the battle line and was voted an annuity for her heroism and patriotic deeds?
4. Name this medal which was awarded to General "Jimmy" Doolittle's 79 fliers who participated in the attack on Tokyo.
5. What is a walkie-talkie?
6. In Army slang it is called "an Army banjo", but it is a useful utensil rather than a musical instrument. Name it.
7. Beside his rifle what are some of the United States Infantryman's other weapons?
8. July 3 is an important date in American military history. Arrange these events with the years in which they occurred on July 3.
Washington's first battle 1883
U. S. naval victory at Santiago 1754
Pickett's charge at Gettysburg 1773
Surrender of Vicksburg 1898
Washington takes command of Continental Army 1863
9. This insignia distinguishes what branch of Army service?
10. Grandsons of two of the best known commanders in the War Between the States, one a Union officer and the other a distinguished Confederate leader, are now major generals in the United States Army. Can you name them?

FOOD TO KEEP YOU FIT

YOU CAN'T BEAT BEETS

Boiling beets in their skins in a large amount of water with roots and several inches of stems left on to prevent "bleeding" wastes time, fuel, and food values, says the New York State College of Home Economics.

Here is a quicker and more economical way to cook beets:

Peel and shred the raw beets and cook them with a little fat in just enough water to keep them from boiling dry. To two cups of shredded beets, use three or four tablespoons of hot water and one table-

Irish Free State's Dog

The Kerry blue terrier is the national dog of the Irish Free State. The Irish terrier, the Irish setter, and the Irish water spaniel do have a bit of a name for hot-headedness, but the Kerry blue, and occasionally, perhaps, are somewhat over-aggressive. Not all, you understand, just some, sometimes. After all, they're redheads.

The Kerry blue, on the other hand, is not red-headed at all. In early infancy he is quite black, but as he matures his coat changes color until by the time he is 18 months or so old, he is a striking blue color all over, varying in shade from a light gray to a dark steel or slate color. The story is that the Kerry blue originally was a sport in the Irish terrier litter, just as now one occasionally gets a black setter in a litter of red Irish setters.

Electrical Phenomena

At temperatures down near absolute zero a peculiar electrical phenomena takes place. Physicists have observed that metals appear to lose their resistance to electricity and that a current once started in a metal circuit continues indefinitely. The phenomenon was believed to be due to the almost complete slowing down of all activity on the part of the molecules and atoms in the metal giving the stream of electrons of the electric current a clear path. Prof. E. C. Schrodinger of Oxford university made a mathematical study of this remarkable change in the electrical characteristics of metals and the theory he has evolved describes the existence of a super-current that manifests itself at low temperatures. This new form of electricity differs from the displacement current and the conduction current familiar to physicists. It can oppose or add its effects to the ordinary conduction current. Professor Schrodinger calls it a supra-current and finds that it flows as freely as would the ordinary current in a conductor of vanishing resistance.

Not for Blowing

The theory is that the practice of having long cuffs of lace was partly responsible for the use of buttons on men's coat sleeves. The lace interfered considerably with action and tailors put buttons on to fasten them back. Another theory is that a certain English king, having equipped his soldiers' uniforms with lace cuffs, found the men were using the latter for handkerchiefs and ordered buttons to be put on the sleeves so that the soldiers would scratch their noses if they attempted to make this improper use of the lace.

spoon of butter or other fat. Then cover the pan and cook the beets slowly from 5 to 7 minutes. Beets retain their color well when cooked in this way, the food specialists say.

Beets are important because of their sweet taste, and the variety in color and texture they bring to a meal. They also contain small amounts of vitamins B-1 and G.

Beet tops are rich in vitamin A. They should be served before the beet roots as they are more perishable. The college recommends the following recipe for cooking them:

Chop the freshly washed beet greens and put them in a kettle with two tablespoons of hot water. Cook them covered until they wilt. Then remove the cover and cook them until the stems are tender. Serve the tops at once with salt, pepper and melted butter or other fat. Lemon juice or vinegar may also be added.

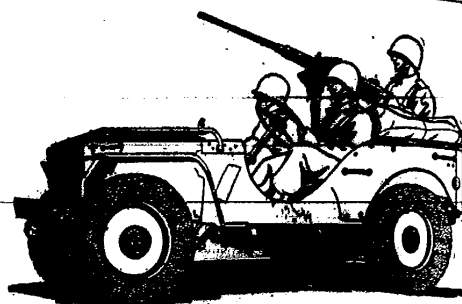

Poor Fish
Woman — "Do you think fish is a brain food?"
Friend — "Can't be — my husband eats lots of it."

STILL ANOTHER USE FOR THE JEEP—The combination of the Army's newest, most maneuverable vehicle with one of its deadliest weapons, the heavy machine gun, is proving to be valuable even beyond first hopes. Low in silhouette, the Jeep knows no obstacle when bringing its weapons to front line action.

WHERE I STAND, AMERICA RULES—Infantry is proud that wherever stands one of its men, it is a declaration that the United States has taken that ground and a pledge that, once taken, that ground will be held against the enemy.

GUARDIANS OF THE LINE—On either flank of the infantry line, the machine gun crew is an ever-alert sentinel to protect their comrades from being surrounded or flanked. Spitting hundreds of bullets in one breath, their weapon is easily carried, hidden and mounted ready for action.

Indian Giver
Rastus Jackson and his wife had separated, and a neighbor was interested when she saw Rastus slip into the yard and disappear into their house.
Deciding to investigate, the neighbor hurried to the back door and met Rastus emerging with a wash-tub tightly clasped in his arms and trailing a washboard and wringer with him.
"What you' gwine do wid dem, nigguh?" she demanded.
"Pawn 'em," came the emphatic reply. "Dat woman ain't gwine to vamp no other nigguh wid mah weddin' presents."
Fifty cents will buy enough fuel oil to permit a destroyer to cruise one mile.

SCHOOL DAYS
