CETTING a new record of 725,000,000,-> 000 ton miles in 1943, your railroads handled a volume of traffic exceeding anything in the history of transportation.

This volume was 80% greater than the previous wartime peak in 1918. It was 73% greater than the previous all-time peak. This staggering transportation job hand-

dled by Erie and other American railroads was made possible by the day-by-day cooperation of the public, the shippers, the armed forces, and government agencies. Ahead lies a bigger job of transportation

because America is attacking.

1943 was the year to get ready. 1944 is the year to go! With your continued helpful cooperation, Erie and other American railroads will keep 'em rolling until victory is won.
