This I believe!"

The Popular Soy Bean

THE SOY BEAN is America's latest good bet lowed by the annual congregain the food program. In the 1930-1940 decade, tional dinner and business meetplantings averaged 2,100,000 acres annually. In 1942 | 1119. this rose to 14,200,000 acres and 1943, 15,400,000. Cut Ironwood for Fuel

Food researchers are constantly discovering Worse even than beech as new proofs of the vegetable's serviceability. Candy weed tree in the farm woodlot makers are using toasted soy bean grits to replace ironwood is best cut for fuel to cocoanut on marshmallow and chocolate bars. Bak-pet of seedlings over the forest ers and confectioners employ soy bean flour as a sub-floor to kill young trees of ash,

stitute for condensed, evaporated or powdered milk maple, oak, and other desirable Because, like meat, it has a high protein value, the New York State College of restaurants put soy bean puffs into meat loaves and Agriculture. croquettes as an extender. Flaked bean kernels are and actually makes a better fuel being marketed as a ready-to-eat breakfast food. than even beech, oak, maple, hic-Baby foods, macaroni and cake flour come from soy kory or other hardwoods. It is

These developments complement the already explored importance of the soy bean plant as a source of livestock and poultry feed, a basis for . plantics, a source of essential fats and oils and a soil fertilizer. The soy bean is here to stay as one of the major crops of the United States.

In spite of all, we still retain our spirit of optimism. There'll be another Christmas.
