Burned out in 3 days

IN training camps, soldiers' L shoes last three or four months — but in actual combat, many troops burn out shoes in three days!

Although our troops get the best footwear, clothing and equipment, the wear and tear of modern war is astounding. Shoes are only one of thousands of items that must be supplied every day in ever increasing quantities. And the big fight is only beginning.

As more and more of our men go into action, the problem of keeping them supplied and equipped will double and triple.

And carrying these materials to our troops will become a bigger and bigger job every day for Erie and other American Railroads.

There will be a bigger job ahead, too, for every American! With our war machine going

into high gear, it will be our job to keep it running at full speed until victory is won.

But, with your continued help and the cooperation of shippers and government agencies, Erie and other American Railroads will keep 'em rolling to deliver whatever is needed to finish the job.
