QUESTION 2. What is the difference between veneer plywood?

ANSWER. Veneer refers to thin slices of wood make by sawing, slicing and peeling. Most of it is made by peeling sheets of wood by placing the log in a Large Lathe and turning it against a sharp knife.

Plywood consists of three, five. seven, or more sheets of veneer, the grain of which is placed at right angles to the adjacent deficiency of the Vital Elements, Expenditures Cross banding. Thus several laywhich has great strength swell or shrink. — Prof. Nelson Brown, forester.

ANSWER. Of course not. A
