WANDERING WITH WILLIE

WITH more and more of the local "gals" wearing slacks, this is a good time to pop those directions on how to stop the little woman from wearing them. The cure in some cases is handled in four easy stages:

- 1—Have her face north.
- 2—Stand three paces south, snap picture.
- 3—Have same developed and a good sized print made of it.
- 4—Show it to little woman.

IT SEEMS to us that we have heard more "dog stories" in the past couple of weeks than we thought there were dogs. Anyway that particular air-minded pup has got himself one whale of a lot of publicity. Or was it a she-male. The way we look at the whole mess is that it is one of the best things that could have happened, so long as it happened. In the future, an ordinary G. I. Noe, heading for home to a sick wife or dead relative will get a priority rating high enough for the trip so that a dog won't come first. Either will a captain of a major "bump" him just because the higher ranking soldier has a better priority.

Incidentally, while we are on the subject of livestock, we have heard very little regarding a bull of high bred ancestry whose picture appeared recently in the dailies who was treated for pneumonia with 2,500,000 units of penicillin, that much sought after drug that is doing so much for the boys "over there" and which is so hard to get for civilian use. We have wondered several times just how much publicity that pup would have gotten if the drug had been taken away from the bull and given to the dog. Oh, my.

NOW, with the weather as owly as it has been since Hannah was a babe, would be an ideal time for some of you folks to invite one of your country cousins down for a vacation visit. With the polio epidemic and the extraordinary winter and road conditions, the country students in high school especially are really behind the eight ball on getting in their required amount of work for the year.

Why not sit down and think of someone you know or want to know and invite them over to your place until the road conditions are better.

WHILE we are on the subject of figures, etc., we pass along this little account of an artist who was employed to renovate some oil paintings in a church, and when he sent his bill for \$31.99 was told that an itemized bill was required, whereupon the following was duly presented:

For correcting the ten commandments	\$5.12
For renewing heaven and adjusting the stars	7.12
For touching up purgatory and restoring lost souls	3.09
For brightening up the flames of hell, putting a new tail on the devil and doing odd jobs for the damned	7.14
For putting a new stone in David's sling and arranging Goliath's head	6.18
For mending the shirt on the Prodigal Son	3.39
Total	\$31.99

Civilian Supplies Will Be Low

Supplies of meat, butter, sugar, canned and packaged foods, clothing, and many durable goods will be smaller in 1945, OPA advises. Record buying and increased military demands in 1944 greatly reduced reserves, which have so far helped meet demands. The present scarcity of metal household equipment and appliances will remain acute until peacetime production can be resumed. At the same time more people will be eager to replace equipment and household furnishings that are now nearly worn out. Shortages always generate an urge to pay higher prices and get more. This increases the

dangers of inflation. In 1945, OPA states, supplies will be large enough to meet essential civilian needs but much smaller than the amount people could buy with the money they will have to spend. The OPA program to meet this situation asks rigid compliance with rationing regulations and price ceilings, plus restraint in buying and a high level of savings, including war bond purchases.

A cut of one-third will be made in the number of new passenger cars available for rationing in February, when the quantity will amount to 2,000 cars on a national basis, or 1,000 less than in preceding months OPA reports. The action will leave about 12,000 new cars on hand.
