A lady was entertaning her friend's little son.

Only fifty cents a day hires a Cameli

... Cheap—until you figure it out

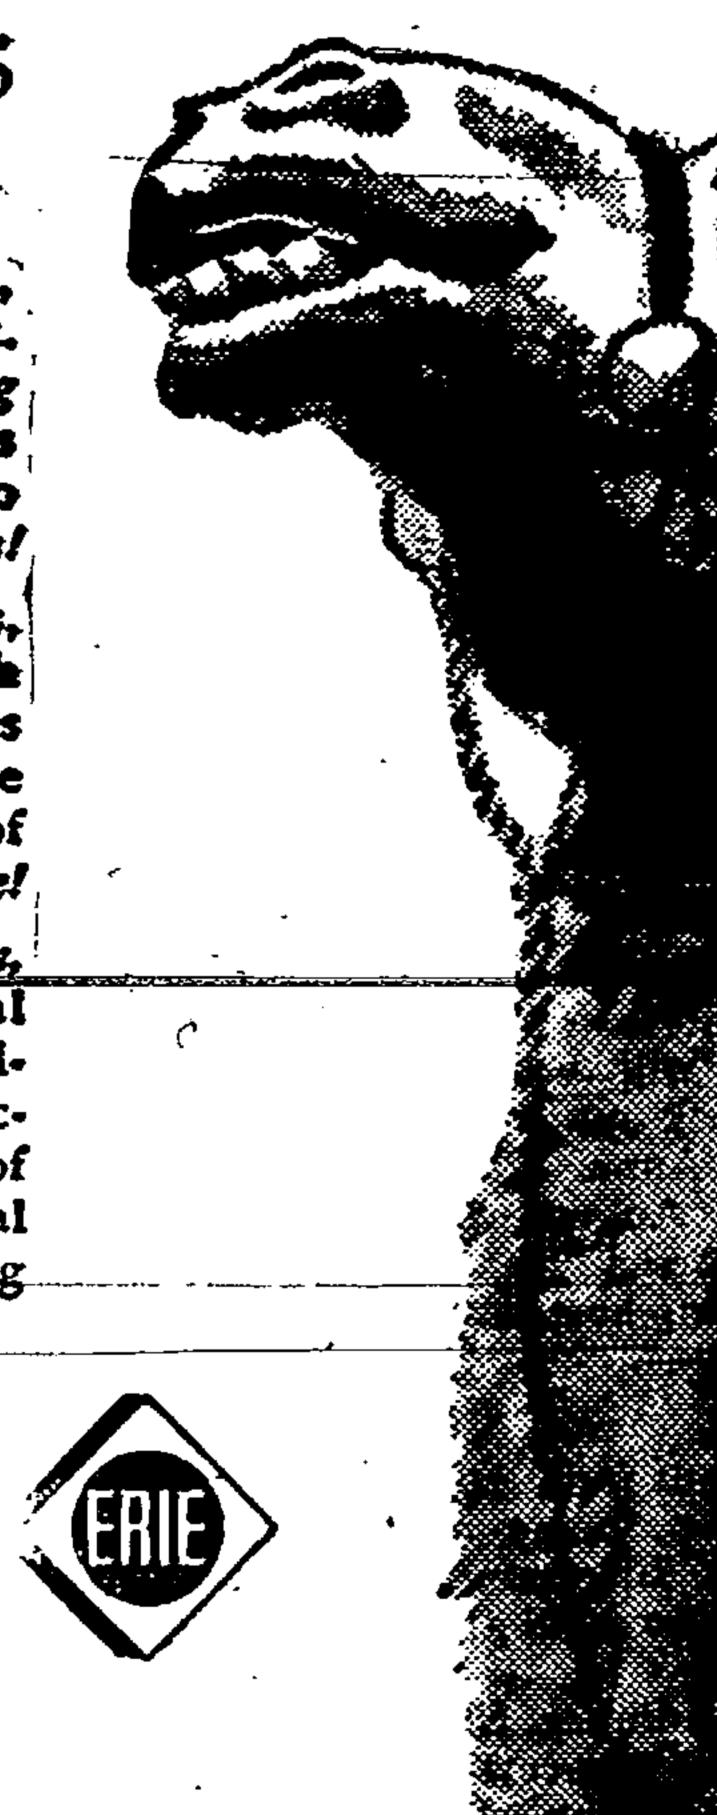

IN Southern Arabia you can hire a camel, I plus the required attendant, for about 50 cents a day.

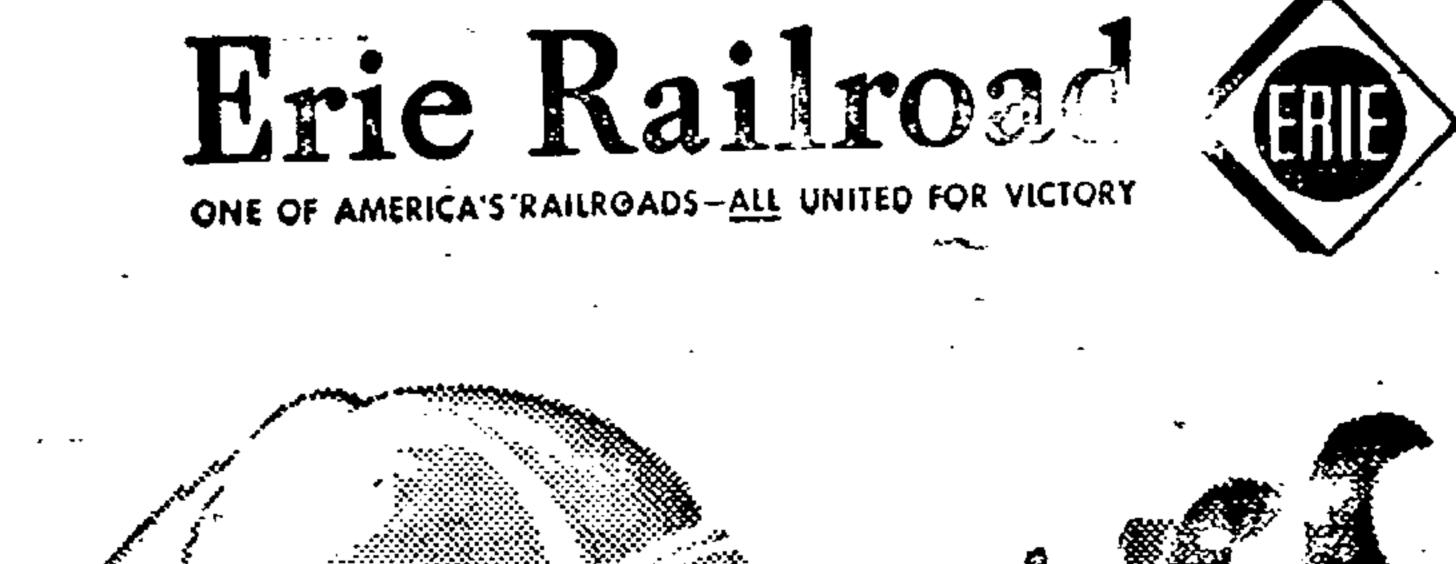

Sounds cheap! But let's see . . .

If you wanted to move a tow of freight, you'd need 4 camels. Total cost per day-\$2. Moreover, camel caravans are slow-moving ships of the desert—average around 15 miles, a day. So your cost per ton mile figures out to 13 cents . . . and that's expensive transportation!

On the Erie and other American Railroads, where workers are paid many times as much as a camel attendant, and each freight car costs the price of 70 camels, shippers can move freight at high speeds for an average cost of not 13 cents . . . but less than I cent a ton mile!

This kind of low-cost mass transportation, created by the private capital of individual investors, enables the Erie and other railroads to meet the needs of our mass production economy. Under the American Way of Life, we have achieved the greatest industrial capacity and the highest standard of living any nation has ever known.

NOTICE

The Empire Gas and Fuel Company, Limited of Wellsville, New York, on August 23, 1945, filed with the Public Service Commission at Albany, New York, the rate schedules shown below to be effective October 1, 1945. These constitute an extension of rates now in effect and will not result in any change in rates for any customers.

CLASSIFICATION NO. 2

***/	- Gross $-$	Dis-	net
	Rate	Count	Rate
	perMCF	perMCF	perMCF
First' 3,000 cubic feet per month	. \$.70	\$.05	\$.6 5
Next 47,000 cubic feet per month		.02	.45
Over 50,000 cubic feet per month		.01	.40
Minimum Monthly bill		.05	· .65
			•

Special Provision:

This service classification expires on September 30, 1946.

CLASSIFICATION NO. 3

	•	
First 3,000 cubic feet per month\$7	0 \$.,05	\$.65
Next 47,000 cubic feet per month4	7 .02	.45
Next 50,000 cubic feet per month4	1 .01	.40
Over 100,000 cubic feet per month3	None -	.30
Minimum charge per meter per month	0 .05	.65

Special Provision:

This service classification expires 31, 1945. Available for commercial and industrial firet, lighting and power, for twelve months or longer continuous service at one location, subject to prior use of available gas by domestic consumers.
