It certainly looks like cheap transportation

ACK in 1812, it cost 40 cents a pound to ship goods by Conestogs wagon from Boston to Charleston, S. C. . . a distance of 900 miles. The receiver waited nearly 2 months for his merchandise. Loss and damage in transit was great. The cost per ton per mile was about 90 cents.

Today, on the Erie and other American railroads a ton of freight is moved safely at high speeds for an average cost to shippers of less than I cent a mile! What makes the difference? Simply

Created and maintained by private investment, your railroads are mass transportation . . . scores of freight cars are moved by one unit of motive power. That's why the Erie and other railroads can provide the low-cost, dependable transportation which is essential to our modern standards of living.
