large gas tanks above ground a menace to surrounding property? Suppose that lightning struck them. Would they explode?

Modern gasoline ANSWER. constructed and ventilated that there is practically no danger of a fire starting from lightning. Even if a fire starts, the tank should not ex-Albert L. Elder, chemist.

Question 5. How were the colors developed on the rocks of the Grand Canyon? Are they mineral or something else?

ANSWER. Most of the color of the rocks of the Grand Canyon is due to iron compounds, which usually are some shade of yellow, brown or red. The steep walls of the gorge permit colors to run from the place where they form down over lower layers. In this way a gray limestone has been so stained with red that it generally has been referred to

ANDUVER'S leading

A good citizen in your town is one who works for the good of your community, as well as enjoying its benefits.

When the Erie brings in, at low cost, the products you use and enjoy it benefits you as well as the Railroad.

When the products you make here are safely and economically shipped out of town via Erie, to be sold, that means progressive railroading can provide.

new money for your local payrolls, pocketbooks, and stores.

And the Erie helps your community in many other ways ... attracting new industries, paying local taxes, and employing local people.

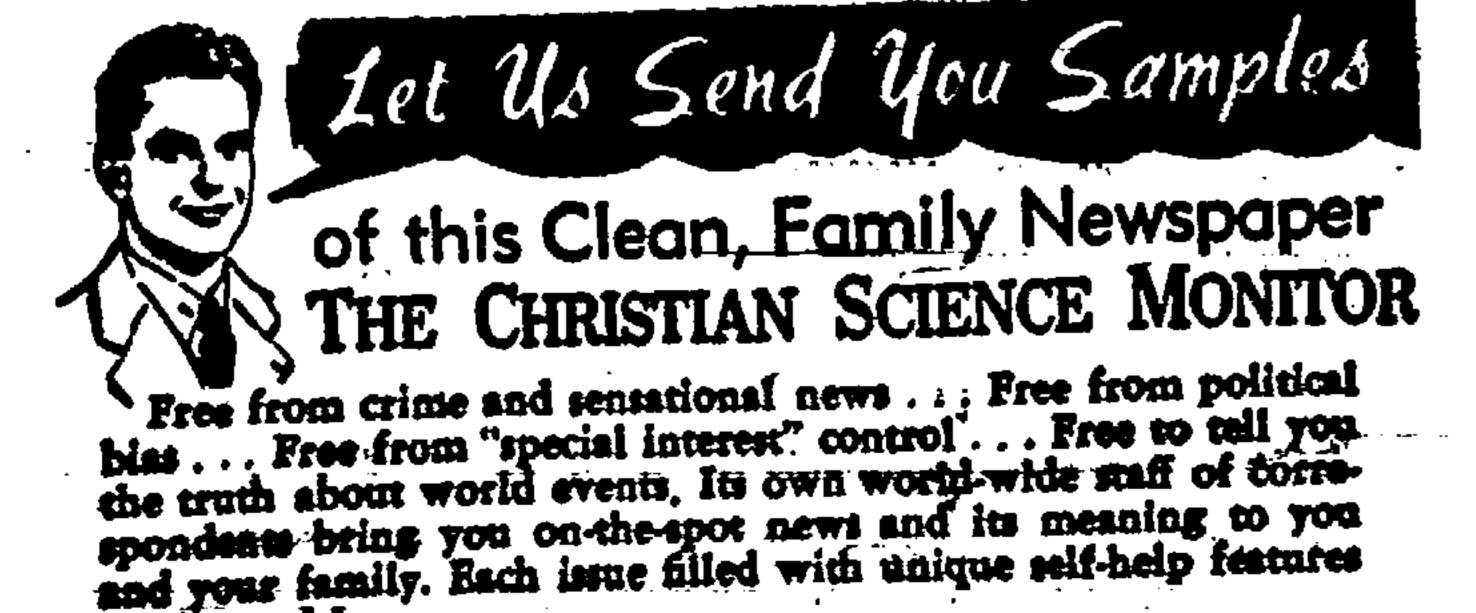

As a good citizen, the Erie will continue to serve you with the finest, dependable transportation service
