Question 2. How can you tell "Yes, and some day you'll die a license. if a tree has been killed by a of a misprint." leak in a gas main?

ANSWER. If a tree is located near a gas main and its Lever Trading Post turns a sickly yellow and there is no evidence of injury by insects, it is possible that gas BUY OR SELL - WOULD TRADE has caused the injury. Call your local gas company and ask for an investigation.

Question 3. Is there any agency that will test my drinking water, or any goverment bureau?

ANSWER. Yes, simply go to your County Public Health Laboratory and ask for a proper container with instructions -and they will test your drinking) water and tell you whether or not it is safe for drinking purposes. — Dr. Henry Jones, bacteriologist.

Question 4. In a recent magazine article, I saw the statement, that a lack of silver in the system sometimes causes tonsilitis. Do we get silver in our food. If so, in what foods is it found?

ANSWER. Silver is not recognized as an essential element; in the human body and a deficiency is never the cause of tonsilitis, either directly or as a

predisposing factor. The immediate cause of tonsilitis is bacterial infection, usually by streptococci. Predisposing factors may be nutritional deficiencies, excessive fatigue, insufficient sleep, exposure
