Boy Scouts of this generation being trained for responsible citizenship "are the promise of men qual- ural enemies. ified to lead the peoples of the United Nations in their efforts to maintain universal peace," says Amory Houghton of Corning, N. Y., president of the on the bitter-sweet side. National Council, Boy Scouts of America, in a message for Boy Scout Week, February 7 to 13, marking the 37th anniversary of the organization.

Mr. Houghton's message follows:

people of different race, language, creed and politics can live and work together successfully.

"Scouting is now active in 51 countries thruout the world and a total of 4,413,139 boys and leaders are presently learning its real value. They are absorbing the meaning of co-operation, self-reliance, responsibility and leadership. They are equipping themselves with an ability to look beyond their own communities. They are dealing in realistic terms with problems that require the application of the Scout Oath—"On my honor I will do my best to help other people at all times." The Scout is not bound by the narrow limits of his own personal world.

"This means that Scouting is making a very real and practical contribution to development of good will and understanding among the nations of the world—goals that have never been reached by any kind of short cut.

"Scouting is fundamental in its scope. It brings together into a united group those of different habits

York State alone has a large quantity on hand. So eat lots of You can serve them in any course of the meal, from soup to dessert.

According to the nutrition experts at Cornell, potatoes have been unjustly condemned as being fattening. Actually one serving of potatoes contains no morecalories than does a banana or a and gravy used on potatoes that make their caloric value rise. One potato supplies only about quired each day.

Another thing, the food experts suggest that you leave the skins on when you cook potatoes -it helps to conserve the iron and vitamin C they contain. Routing Pantry Pests

Insects may invade your pantry at any season of the year if they like the food stored there. So keep cereals and flour well covered, and in a dry, cool place. If you have dry milk on hand, may be heat-treated in its original package, sieved, and then transferred to metal or glass containers. Place the package in a slow oven, 140 degrees F, for A about 30 minutes. This low temperature kills insects and their eggs, but has no effect on the ⊿ quality of the milk.

If lack of money is your only Recommended problem, you're lucky and should By RING LARDNER TAHW 18 IY-A CENTIPEDE
