WHERE IS THE BOOM?

THE expected boom in housing construction has not materialized to the extent expected and the 4-H Club Girls Plan cause is not hard to discover.

A survey of building materials thruout the Unit-Belmont Central School Mutual Telephone Co. ed States, conducted by The New York Times, re- Belmont. — Allegany county veals that the price of some building materials has of taking part in a second annual stockholders of the Allegany Mureached the level of the notorious "black market" clothing revue on July 31st, to be the the dat the office of the company, held in Belmont Central School held at the office of the company, held in Belmont Central School that beset the industry a year ago.

No wonder The Times, in its factual discussion auditorium. on curtailed construction, says that "legislators and article of clothing since October, the transaction of such other industrial leaders who argued that removal of price 1946, may take part in the counbusiness as may properly be controls was needed to lower prices are having to ty-wide event. answer some embarrassing questions now."

While some business men and some legislators that the aboli-dress, suit or ensemble; 3, best tion of price controls would spur production and re-dress or ensemble; 4, party dress, duce prices, the record of the past months has proved ment. Altho many girls are them wrong. Prices have gone up faster than before, being encouraged to take part

PROVING CIVILIZATION

IF A SAVAGE suddenly remarked to his neigh-the girls. bors that a new comet was in the sky, they would ed Wednesday, July 30, by the look upward without seeing it. When he explained following judges: Miss Helen A. that he saw it thru a tube, fitted with glasses, they willerton, home demonstration county would call the priest for the purpose of preparing a Home Bureau, and Mrs. Elizafire test.

If the astronomer insisted that in three days, he Cornelia A. Bellows, assistant would tell them its size, where it travelled, when it this advanced announcement in would be closest to the earth and that in 30 days order to give club girls ample they could see it with their eyes, the savages would time to make that "Blue Ribbon" probably burn their companion alive.

Once we were like the savages. Nowadays, from leaders of the club to which thanks to intelligence and a general appreciation of they belong, and individual club the sciences, such an announcement causes little gen-members may contact the 4-H eral interest. No one doubts the truth of the scien-Club office here for help. tific astronomer's statement. Such discoveries happen every year without comment or terror on the part of the people.

Civilization, it would seem, is moving forward.

Progress can be seen when we compare the attitude of primitive people towards that of advanced people.

The moral is: Just because the papers are filled with murder, divorce, scandal and graft stories — ITODEMS? don't forget that the world and its people have improved and are improving every day.

THE PEOPLE WILL DECIDE

WITHIN the near future, the United States will learn whether or not it is making progress in the war against fire.

The President's Conference on Fire Prevention, which took place in May, laid the groundwork for the most intensive and scientific campaign to reduce our staggering losses ever undertaken. Some 3,000 delegates, representing every part of the country, attended. An ambitious and all-inclusive program! was developed. Every phase of fire prevention activity, from modernization and enforcing of building codes to keeping the public informed of the menace, is involved. It is an emergency program, designed to deal with a real and growing emergency condi-

These delegates are now working at home. Some! of their work will be of a technical nature, such as!' advising on community fire equipment and the training of fire department personnel. But, in the long run, the success achieved will depend primarily on the amount of public support given it. The great majority of fires are the result of individual ignorance and carelessness. A great part of the disgraceful total is made up of home fires, most of which could be prevented. Making America's homes safe Allegany County Representative from fire is strictly a job for every home-owner—no one else can do it for him.

Fire loss measured in both lives and dollars with the state the cor

is at an all-time peak. We have the means and the Annual Reunion of knowledge to reduce it to a small fraction of its pres- Church Family Held ent total. The American people must decide whether that is worth doing.

There come dreary periods when you never relatives and seem to meet any new person whose face, vocabul- Canisteo, Allentown, P ANDOVER, N. Y.,

| hall between 1 and 8 p. m., abso- | REGULAR MEETING lutely free of charge. The Woltz Studios of Des Moines, Iowa, nationally known children's photographers, will be in charge. The Andover News wants a picture of your child to print in its forth-Coming feature "Citizens of Tomorrow," a series of photographic studies of local children. The more we get the better the feature will be, so the co-operation of mothers and fathers is urged.

It often seems to parents that children are little one minute and grown up the next, so fast does a child's growing stage pass. Here is a splendid opportunity to catch a likeness of your child or hildren at this present stage for the pleasure you will get out of in future years and for the thrill of seeing it in print. You will want to clip and preserve for the youngster when he o. she grows up.

There is no charge or obligation for taking the pictures. Parlents don't have to be a subscriber or even a reader of the News. You do not have to purchase pictures either, tho you may obtain additional prints by arranging direct with the studio if you want them. That is entirely up to, you. All youngsters, accompanlied by a parent or other guardare welcome. There is no
