list in their vitamin A content have allowed a \$175 monthly combined KIEENITE the Brushless Way a close rival for top place. Kale contains more than half as much carotene — yellow-orange pigment which the body converts into vitamin A-as carrots and new research results show that carotene from kale is utilized by the body better than 1.

> By cooking the green leaves in just enough boiling, salted water to prevent sticking, and just long enough for the leaves to be tender. the return of this vegetable's vitamins and minerals are high. Cooking does not destroy the carottene in kale but some of the other food value in this leafy vegetable can be protected. By quick cooking, kale re- 1. tains a good amount of vitamin C-. the vitamin which is most easily destroyed with cooking. All the valuable minerals, calcium and iron, h kale are kept from escaping into the water by cooking kale in a very I small amount of water.

### Sharp Knife

While everyone realizes that 1. ' l takes a sharp knife to do a real good job of cutting meat, many do I not know just how best to sharpen i. knives are not sharp but they have in only been ground down to a point where they are ready to be properbeveled and sharpened. First, dum stone can be used. Then. oil plete the equipment. In speaking of steeling, the steel is used to straighten the edge of a knife and not to sharpen it. The knife edge is generally turned when it comes in contact with a bone or other hard object. This explains the need for frequent steeling of the knife, as the butcher does in his shop. A half-dozen strokes on each side of the knife lare sufficient in steeling. Holding I the knife at the proper angle to the
