Show Decline In Yield and Value

December 22.—The cellent harvests were secured, secording to the annual Federal-State summary issued from the New York Department of Agriculture and Markets.

The principal commercial veg-etable crops for fresh market, grown on 117,350 acres, slightly above average though eight per cent under 1946, yielded 615,-900 tons of produce, a drop of 36 percent from 1946. This was valued at \$34,163,000, a shrinkage of 17 percent from the 1946

Vegetables for commerical processing on 90,950 acres totaled 237,840 tons valued at \$9,076,-000 in contrast to 131,700 acres yielding 493,310 tons and valued at \$18,416,000 at farm prices

John D. Rogers, Sr.

HAT better time than Christmas for every American to reaffirm his faith in God and emulate the great builders

of our nation God-fearing men who turned to prayer for guidance and inspiration. Only through pray-

er and faith can we assure the continuance of freedom without

fear tolerance without tyranny democracy and last-

ing world peace. Without the worship of God, life is stark.

On this Christmas Day, let us humbly pay homage to Christ who

humbled himself for mankind. Let us resolve, through Chris-

tian fellowship, to do our part to maintain the rich heritage of

our epuntry and to help those less fortunate peoples of the world.

will make an expanded tuberculosis control program possible in Allegany County in 1948," Mrs. prompt and whole-hearted response to our annual appeal for funds and we know that there are many Allegany County residents who, although they have overlooked acknowledging their Seals in the rush of Christmas preparations, will get their checks in the mail before Christmas. We consider this generous response an endorsement of our program and expression of a community conviction that tuberculosis can and must be conquered. No community can afford to compromise with a disease as menacing tuberculosis. The citizens c Allegany County, by their Christmas seal purchases, have shown their determinatoin to fight and conquer tuberculosis."
