The following suggestions are notes for parents of music students, quoted from the Music

1. Your child has just returned rom a joyous, carefree summer. His responsibilities have been few, his pleasures many, so don't be disturbed if he doesn't evince a routine of school work, music lessons and many other extra—curricular activites. Your understanding of the problem involved will help your child effect the transition in a few weeks.

2. Let your actions show that you regard music study as an integial part of his education—not ust something to be dropped at the first sign of indifference.
