Postmaster, Mildred H. Burd announces that the five-digit Zip Code for Greenwood is 14839. Everyone in town will use this Zip Code on all correspondence to speed mail deliveries and reduce the chance of missent mail. The local office often gets mail for Greenwood Lake and that office forwards our mail. Postmaster Mildred H. Burd stressed the importance of learning and using the town's Zip Code number on the return address. In answering mail use the Zip Code number on the return address of incoming mail, following the name, town, state and Zip Code number. The Post Office Department in Washington, D. C., will start the new system of improved mail dispatch and delivery nationally July 1, 1963. With Zip Code the clerk needs only to glance at the number to know what national area, state and post office the letter is destined. The United States will have the most modern mail system in existence.
