 Parents, come with your children to Sunday School. We never outgrow the need for God's word.
 11:00 a. m. Morning Worship. We welcome you to one Morning Worship. The pastor will bring the morning Bible message. Our desire is that God will speak and bless Himself to every heart, in prayer, in song, and in the special music.
 Plan to attend.

HEALTH FOR ALL

This column is sponsored, in the interest of better health, by the Allegany Health & Tuberculosis Association, 44 Schuyler St., Belmont, N. Y.

The Price of Public Apathy
 NEVER underestimate the power of a retreating enemy—in this case tuberculosis.

Drugs now exist to cure—and someday completely to conquer—this disease. But as the death rate decreases, carelessness increases. The result is that today tuberculosis is unnecessarily winning many small battles because of public apathy and unconcern.

A recent study of tuberculosis patients in Baltimore, Md., for instance, has revealed unnecessary delays of from two months to as long as two years in diagnosing active tuberculosis of the lung. Of 52 patients studied, the diagnosis of tuberculosis was made quickly in 23 cases. But with 29 patients or 56 per cent, there was an unnecessary delay in recognizing the disease.

Unfortunate as this delay in diagnosis is, the problem is by no means rare. And each postponement in diagnosis is a direct threat to others. An infectious disease, tuberculosis makes each of its victims—if the disease is untreated—a potential source of infection for every person with whom he comes in contact.

On the other hand, early diagnosis, proper care and drugs, and up-to-date treatment not only can cure tuberculosis patients but send them back to their homes, their families, and their jobs with no fear of infecting others.

Anyone advised to get a chest X-ray should not be prevented from doing so by cost—in many places X-rays, free of nominal cost, are provided either by health departments clinics or tuberculosis associations. Always, according to your local Christmas Seal organization, anyone complaining of persistent cough, weight loss, fatigue, loss of appetite, or an unexplained fever should obtain a tuberculin test or chest X-ray.

LIVING UNDER LAW

TIPS FOR HOME BUYERS
 Take several precautions when you buy a home:

1. You may wish to pay up your contract before full payment is due. Provide for this before you sign the contract, or else you may find yourself paying interest for the full time.
2. Suppose you can pay half down, or even less. Then, you may get a deed and give a note and mortgage for the rest, sometimes a better way to pay for your home. It gives you the right to redeem if you miss payments.

GET WRITTEN CONTRACT
 Of course, obtain the foundation, roof and plumbing. Get a title insurance policy or abstract. Get it show the exact list of mortgages, judgments, taxes.

What about the owner of the property? What about the title?

Suppose a well, heating system, or other appliance, is guaranteed as adequate. Get this guarantee in writing. Any agreement, preliminary or not, should state all the terms of sale. Before you sign, make sure that you know what you are binding yourself to do and what you are going to get in return.

Compare the legal description of the land with a property man, and with the land itself in relation to adjoining properties and roads. Be sure the legal description includes all the land you think you are buying.

Suppose you are buying a property and roads. Be sure the legal description includes all the land you think you are buying.
