Pheasant season should prove to be more rewarding to many hunters this fall as a result of the 4-H pheasant rearing program recently completed. Game officers in Allegany County inspected and released 1,844 birds which were raised by 4-H members to seven weeks of age. The officers moved them from the rearing pens to places of good cover where they will have the best chance for survival.

Cool-season crops like lettuce, spinach, radishes, turnips, and kohlrabi can be sown around August 1 so they will mature during the cool fall weather.

John Campbell, then postmaster general in Boston, was the man to issue the initial number of the Boston News-Letter.
