Superteacher
by Jean DeRemer

Just as sure as Superman came from Krypton, many students believe teachers come from some far distant planet.

I have news for all student: Our teachers are sent here from the planet Queero!

Q. Mr. X, just where did you go to school?

A. I attended the School for Humanization of Teachers at Meanness, Queero.

Q. What did you study there?

A. Well, first, all new teachers have all their eyes, except four, two in front and two in back of their head, removed.

Our natural meanness is concentrated on giving homework on Fridays and over long vacations.

Our super-sharp ears and strong wills don't have to be touched. We hear everything and never laugh when the class laughs and just love to hear students plead for postponement of tests.

Q. Where have you taught before?

A. I've taught at the FBI school, in all the Armed Forces, and at Sing Sing Prison.

Q. How long have you been teaching?

A. 487 years.

Thank you, Mr. X.

This interview has been given without change. So, students, you were right. Let's all band together to fight them.

Columbus Day

What It Means Today

October 12, 1492 strikes a familiar chord in everyone's heart and mind. It was the beginning of a new era in the history of the world, of course, but just how can we apply the meaning of the term "Columbus Day" to present day America?

How many times has there been a reoccurrence of this important event in the developments and discoveries of America? The saying that "History repeats itself" certainly applies here.

What a shock it would be to Columbus if he were to return today and see what has happened to the "stopover" in his quest to find a route to China and the Indies.

Yes, we must remember Christopher Columbus on October 12 for he stands for what is a great part of America.
