**Agriculture Census To Be Taken In Allegany County**

Plans for taking the 1964 Census of Agriculture in Allegany County have been announced by Phillip John Dillon, newly-appointed census crew leader for the county.  
The job will be done in three stages, the crew leader said. First will come recruitment and training of enumerators to count all farms in the county. About one enumerator for each 150 farms will be needed.

Shortly after November 5, the Bureau of the Census, an agency of the U. S. Department of Commerce, will start the second stage by mailing agricultural census questionnaires to all rural box-holders in the county. This will give farm and ranch operators, who are required by law to fill out the forms, a period of time to consult their records and will in answers to the questions.

In the final stage, enumerators will visit each farm in the county to collect the questionnaires. At the time of this visit, the enumerators will help farmers complete answers to any questions the farmers may have had difficulty with. Enumerator visits are scheduled to begin in this county, November 9. Enumerators will take about three weeks to complete their work, the crew leader estimates.

The Census of Agriculture is taken every five years in the years ending in "4" and "9" to gather up-to-date information on the nation's agricultural resources and production. Such information is vital in making decisions affecting many segments of the U. S. economy. Data gathered include the number and size of farms, acreage and harvest of crops, livestock inventory, information on farm equipment and facilities, farm products sold, and use of fertilizers, insecticides, and herbicides.
