Career Food Production Reports Area Holsteins

Lifetime milk and butterfat production levels for Registered Holstein cows in this area have been announced by Holstein-Friesian Association of America. The individual animals have been credited with career food production totals exceeding 100,000 lbs. (46,500 quarts) of milk. The official test-

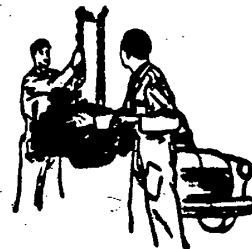

ing program is sponsored by the Association and supervised by the state and local testing organizations.

Because of the high cost for herd replacements, cows that stay in the herd longer and achieve high lifetime production have proven to be more profitable. The Holstein Association has 35,000 cows on file that have attained the 50-ton production milestone.

Local Holstein breeders and their long-time producers reported by the organization include:

Harkenrider Chemco Penny — 5336997 (GP), 110,010 lbs. of milk and 3,729 lbs. of butterfat in 2,381 days; She is owned by Paul J. Harkenrider, Harkenrider Farm, Rexville.

A recent study found that the percentage of income spent upon food varied from around 30 per cent for families with incomes below \$3,000 to around 12 per cent for those earning \$15,000 or more.
