HALL OF FAME

Thomas Charles MacMichael

By Kathy Spencer

Another honored Senior who has found his way into the Hall of Fame is Thomas Charles MacMichael. The son of Mr. and Mrs. Phillip MacMichael, Tom was born March 20, 1955.

Majoring in math and science, Tom still finds time for activities. He has participated in band and choir for six years and has been a member of National Honor Society for three years. He has also been very active in sports which include: soccer — four years; Varsity basketball — one year; baseball — two years; track — two years and swimming — six years.

This year Tom was a recipient of a New York State Regents Scholarship. He plans to attend SUNY at Brockport where he will pursue a course in Liberal Arts and major in biology.

Panther Prowl

BASEBALL

by Eileen Atwell

It was bad news for our baseball team, as they were defeated by Alfred-Almond in both of two consecutive games. The score of the first game was 9 - 5. They put up a good effort in the second game, but their opponents held a 2 - 0 score over them.

Junior News

by Elaine Bronson

The Alumni Banquet will be held on May 26. The Juniors will help in the serving of this Banquet. All alumni are welcome.

Congratulations for the fantastic profit that the Juniors made on their plays. Their grand total was \$232.

Don't forget the Junior Dance to be held this Friday, May 11, featuring the Barge. Admission will be \$1.75 per person. The time is from 9 - 12 in the school auditorium. See you there.

Senior Interview

by Priscilla Billings

This week's super senior is James Clair Perkins. "Jim" was born April 21, 1955. He is the son of Mr. and Mrs. Daniel Perkins. Jim has four brothers, Bob, Dick, Karl, Kevin and two sisters, Teresa and Kathy.

Before coming to Andover, Jim attended Alfred-Almond. In Andover, Jim has been active in the lunch council for two years.

Jim's future entails schooling at the Wellsville Vocational Division of Alfred Ag-Tech, where he will major in Food Service, which he is currently enrolled in at the occupational center in Belmont.

The students of A. C. S. all wish Jim best wishes and the best of luck with his future plans. Good luck, Jim!

Cafeteria Menu

Week of May 14 - 18

CONSERVATION COMMENTS

By Paul M. Kelsey

WILD FOOD

As food prices climb higher and higher, many people are looking for other ways of combating soaring prices besides boycotting food stores; after all you can get pretty hungry eating a boycott. It is already obvious that fishermen are using it as an excuse to spend more time at their hobby. Woodchuck hunters can make the most of their time after bringing home the cleaned carcass of the chuk instead of draping it over a fence.

A woodchuck has a tough hide, but it really isn't too hard to remove if you go about it right. Chop off the head, tail and all four feet with an ax. Pick up a fold of skin across the back and make a slit through the hide about three or four inches long, insert the fingers of both hands in this cut, and pull in opposite directions. Don't worry too much about folklore dealing with the "kernels" under the forelegs. If you find them, remove them but if it is a young and tender chuk, chances are you won't even find them. Remove the fat that comes off easily. All methods of cooking should be preceded by parboiling in a covered pot with salted water. Boil young chucks for half an hour, while an hour should be enough for even the oldest. After draining, the meat can be roasted, fried, used in stew or barbecued.

Bringing in wild meat, whether it be fish or game, takes a little special skill. The fields and woods are a source of many wild plants that can be collected without any special skill, beyond the ability to identify the plants for which you are searching. One caution, however, some plants may be good to eat at certain times, or certain parts may be safe, while at other times or other parts may be poisonous. Young pokeweed shoots are edible, for example, but their roots are poisonous.

Scissors or knife, and a plastic bag are the only tools that you will need to collect most wild plant foods. When cutting greens in your garden, you select the younger, more tender ones. This same choice is even more important in the case of wild greens, for as they

get mature they may become quite bitter. Common dandelion is a case in point. Young, rapidly growing leaves are good before the formation of flowers, but later you had best concentrate on the flowers for dandelion wine. Plants that grow in a rosette, as do dandelions, are most easily handled and washed if they are cut off at the root crown so that the rosette remains intact.

By careful cutting it is often possible to extend the length of time that a plant is in an edible condition, for new leaves will develop making a second and third cutting possible. Marsh marigold is one such plant where removal of leaves and flower buds can double or triple the volume that may be taken from a small patch without damage.

If you find that the greens are a little bitter to your taste, this can often be remedied by pouring off the first water used to boil the greens, and finish with a second boiling in fresh water. The effectiveness of this technique can be demonstrated with skunk cabbage. Taking the young leaves, when they are emerging like a small six-inch Chinese cabbage, they can be cooked in three or four fresh changes of boiling water and become palatable.

Before it flowers the tender tops and young leaves of milkweed are good. The young shoots, when they are only a few inches high, can be used like asparagus. If you miss these, you can use the pods, when about an inch long, as you would okra in soups.

One of my favorites, maybe because it is about the first one in the spring, is rosettes of winter cress or yellow rocket. Some people say it is a little bitter, but just say it is spring.

You will be surprised at all the greens that you pull up as weeds in the garden and throw of the compost pile. Lamb's quarter or silver-leaved pigweed is related to spinach, and when small, six to 10 inches high, can be treated like spinach. Purslane is another garden weed you can't beat for it is considered a delicacy in many countries.

R. D. Carriers Aid In Farm Survey

Rural mail carriers out of the Andover Post Office are distributing questionnaires to farmers for the June, 1973 Rural Carrier Cattle Survey.

A Joint Federal-State project, the survey seeks information on cattle, milk cows, and calf crop.

The Post Office and rural mail carriers provide the contact with farmers for this survey. Carriers are distributing questionnaires and return envelopes throughout the New York State, leaving them in mail boxes of a cross section of farmers. Completed questionnaires from New York farmers are to be mailed in the return envelopes provided to the New York Crop Reporting Service at Albany for summarization. The return envelopes are pre-addressed and require no postage.

The completed questionnaires are used to derive official cattle statistics for the State and Nation. Collection of crop and livestock reports was started by the U. S. Government more than a century ago to provide accurate information to all interested in agriculture.

Editorial TO SOMEONE SPECIAL

by Judy Bliss

To each of us there is someone special. She's always beautiful in our eyes and her love for us is unequalled.

Our mothers, we think of them as our consciences, are always there to remind us to do something we were trying to forget. They make sure we eat our breakfast, comb our hair, and make our beds. However, there is much more to being a mother, than organizing a household. They have been with us since birth, feeding, cleaning and teaching us. They have made us what we are today. Their biggest job in life has been to give us facts and teach us how to use them, to show us how to think for ourselves. Mother's are always present to watch our mistakes and teach us to correct these mistakes. They've prepared us all these years to be independent. And no matter how much sorrow it is for them to see us leave for college or a job, they are always there to help us along.

Mother's are the most beautiful people in the world. We can never return fully the love our mother's give to us, but we should pass this love and understanding on to our children.

This Mother's Day let's show our mothers how much we appreciate the kindness and understanding they have shown us during our life, and more important, let's thank them for letting us become individuals.

Track

by Brian Cannon

On Wednesday, May 2, Andover traveled to Bolivar for a quadrangular meet. Bolivar won the meet with 118 points followed by Richburg with 87, Andover with 43 and Belfast with 11. Andover's only first place was the mile Relay Team of Rick Cahill, Chris Mattison, Chad Grossman and Roger Godown with a time of 4:15.8. Chad Grossman picked up our only second place, clearing 3'6" in the Pole Vault.

Gus Weber was third in the Shot and Discus. Others picking up thirds for Andover were: Brian Cannon in the Triple Jump, Bill Cornell in the High Jump and Dennis Ordway in the 100.

On Saturday May 5, the Sixth Annual Alfred-Almond Invitational was held. Andover picked up 7 points to place twelfth as a team. The Mile Relay Team of Rick Cahill, Mike Bliss, Roger Godown and Chad Grossman placed fourth with a time of 4:12.1, while Brian Cannon placed third in the Triple Jump with a leap of 38'4". The meet was plagued by a cold wind which kept the times down

Downbeats

The first Spring Concert of the year will be held Friday, May 18, 1973 at 8 P. M. in the ACS Auditorium.

Second Graders' Thoughts On Mothers' Day

My Mom helps me in many ways. She helps my Dad also. She helps my brother, and she plays with us. Bruce Baker

My Mom does things for me. She makes my bed all the time and she helps me with my work. My Mom does that because she likes me. I like my Mom because she is good at it. Mary Jo Palmateer

My Mom is best because she loves me. We should give her a day off. She loves men too. I love her too. Cindy Fish

My Mom is the best because she helps me when I am hurt. And I help her when she is sick. And I love my Mom. And she is nice. Jeffrey Ordway

My Mom is the best. She buys me a lot of things. She helps me do my work. She loves me very much and I love her. I would never run away from her. She takes care of me when I am sick. She's very pretty. Mary Anne McCormick

My Mom is the best because she loves us too. And she helps us too. My Mom's the best because she is nice too. My Mom's the best because she cleans the house. She helps us and reads to us and lets us hold the baby and lets us play with the puppies and helps us tell time and helps us do our homework. Cheryl Hurlburt

My Mom is the best because she helps us grow with milk. She takes us to school if we miss the bus. She helps us do things when we are sick. She buys us all our medicine. Zoelinda Rose

My Mom's the best because she loves us too. And she helps us too. My Mom's the best because she is nice too. My Mom's the best because she cleans the house. Michele Dannheim

My Mom is the best because she helped me when I was home for the week. And she helps me alot. And she loves Tamara and Daphne. And she mops the floor. Daphne Riffle

My Mom's the best because she feeds me. Takes care of me when I'm sick. Gets me ready for school. Gets me the things I want. Jim Folsom
