1974 Wheat Program Details Announced

Allegheny County wheat producers' allotments for 1974 will be about three times the size of their 1973 allotments, according to David Bennett, Chairman of the Allegheny County Agricultural Stabilization and Conservation (ASC) Committee.

Bennett said 1974 allotments will be based on the national allotment of 55.0 million acres, announced August 16 by Secretary of Agriculture Carl L. Butz, and that individual allotment notices will be mailed to farmers in a few days.

The allotment represents the number of harvested acres of wheat, based on the estimated average yield, which would result in production equal to estimated domestic and export disappearance in the 1974-75 marketing year. The allotment does not restrict the amount of wheat that can be planted.

Bennett listed the following 1974 Wheat Program details:

New to the Wheat Program is the target price feature. If the average market price for wheat is at or above \$2.05 per bushel target price, the producer will receive no payment. If the price average is below the target price received by all farmers during the period from July through November 1974 the farmer will receive the difference between the target price and the average price.

There will be no preliminary payment. Any payment due will be paid after December 1, 1974.

There will be no set-aside requirement for 1974 and there will be no conserving base requirements for the four-year life of the 1973 ACT.

For 1974, producers may substitute any annual non-conserving crop or a cropland conserving crop used for hay or pasture in order to preserve their wheat allotments and to make them eligible for any payments under the target price feature.

Loans will be available to producers on their 1974 crop wheat at a national average of \$1.37 per bushel.
