THE BONES OF AN ORGANIZATION

The body of almost every organization has four kinds of bones.

The Wishbones — Who spend all of their time wishing someone else would do the work.

The Jawbones — Who do all the talking but very little else.

The Knucklebones — Who knock everything that anyone else tries to do.

The Backbones — Who get under the load and do all the work.

The Lazybones — Who want everything but does nothing to help get it.
